VOLUME 24. No. 37 — CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA — FRIDAY, MARCH 14, 1919

"Can't Afford to Paint."

The man who says that, forgets that painting properly done is economy, and the fact is he can't afford NOT to paint.

How often you require to paint is largely dependent upon the paint you use.

THE SHERWIN-WILLIAMS PAINTS

cut last others. They are the most economical paints you can use, because they cover most and wear longest. Add to this their good appearance, and you have perfect paints—*The Sherwin-Williams Paints.*

They are made for many different kinds of painting. Whatever it is you want to paint—a house, or anything in or out of the house—we make the right paint for that particular purpose—not one slap-dash mixture for all.

GOLD

By ROBT. H. WILSON

Gold! gold! shimmering gold,
What men do can never be told
Struggling to win thee first and last,
Striving to keep thee safe and fast:
Blinded to honor and friends and love,
Bartering hopes of heaven above,
Braving hunger and storms and cold,
All for the sake of the shining gold.

Gold! gold! glimmering gold,
What is the lure which thou dost hold?
Stealing the hearts of men away,
Making them fierce as beasts of prey
Hiding to crouch and spring by stealth
And wrest from the weak his hard earned wealth:
Slaughtering, trampling, young and old,
There is no truce in the war for gold.

Gold! gold! glittering gold,
Souls and bodies for thee are sold;
Little men reck of crime and sin
Long as the aureate stream flows in:
Murder and theft shall count for nought,
Widows and children may starve and rot,
But the name and fame shall be extolled
Of him whose coffers are filled with gold.

Gold! gold! arrogant gold,
They who have thee are blatant and bold—
"We are the lords of the land and sea;
Down ye rabble on bended knee;
Ours the kingdom, the glory and might,
Riches is power, and wealth makes right;
No other honor which men may hold
Can be compared with a crown of gold."

Gold! gold! treacherous gold,
Fatuous promise dost thou unfold
Once and again to the dazzled sight,
Then swiftly pass as the eagle's flight,
Leaving the victims to dark despair,
Bound in the leash of want and care;
Little thou carest, thy heart is cold
As the heart of ice—O pitiless gold.

Gold! gold! diminuent gold,
When the scrolls of judgment shall be unrolled,
When the Ruler of heaven and earth and sea
Shall bring all things to his just decree—
When earthen baubles receive their due,
And thou art weighed in a balance true—
Thou shalt be as dust of the street,
The saints will tread thee beneath their feet.
Thy power shall vanish, the Lord will hold
Thy value as stubble—poor worthless gold.

Saltsburg, Pa.

GO TO CHURCH SUNDAY

Sunday, March 16th will be Annual "Go to Church Sunday" at both the Congregational and Methodist Episcopal Churches. Special Sermons and services befitting the occasion will be rendered. An urgent invitation is extended to every one who may not be in the habit of attending to be present on that day.

Everybody is going. Come and pack the Churches Sunday morning at 11 o'clock.

Local and Personal

GET MY MONEY

Used pianos Victrolas bought for cash. 318 Hewes Bldg., San Francisco.

Miss Florence Draper of College Park, charming elocutionist, will appear on the program Friday night, Come out and enjoy what promises to be a fine program.

Mr. Dudly Rider, an old friend of Mrs. R. E. Dunphy, just discharged from the Radio Department of the Navy, on his way home to Longmont, Colorado, stopped off at Campbell and visited the family of R.E. Dunphy. His mother and Mrs. Dumphy were very dear friends and old chums. They had a delightful visit.

Judge Boyd, ExCongressman from the state of Nebraska and wife and daughter Mrs. J. C. Harris and little son, Master Chalmers Harris are visiting in the home of Mr. and Mrs. C. H. Whitman this week.

At the Annual Banquet of the Y. W. C. A. in San Jose last Thursday evening two tables were filled with Campbell friends of the association. All enjoyed most thoroughly, the reports from the various departments, especially the tableaux and pantomines of the Girls Reserve.

Mr. J. J. Vandergon has recently sold his farm, and with his family will leave the first of April for Maple Lake, Wright County, Minnesota, where he expects to put the boys on a farm where he thinks the boys can make better progress in a financial way than they are able to do in California. The people of Campbell are very sorry to see Mr. Vandergon and his family move out of their midst, as every one esteems them as a fine family and valuable citizens of the community. However we all wish them all the very best of succees in their new home, and hope that when they have made a fortune, they will return to California and make their home, where they can easily spend their money, and enjoy dear old Santa Clara County and particularly the town of Campbell with their host of good friends.

Home Industry League of California

Jean Loughborough

"Made in California" foods are to have a week all of their own for proving what great things can and are grown and manufactured in this State.

The date for the celebration has been set for May 5 to 10, and it is expected that Governor Stephens will issue a proclamation declaring that time a "Made in California" week, urging every manufacturer, agriculturist and dealer to make a special exhibit of home grown or manufactured wares.

The Home Industry League will distribute free throughout the State, thousands of cards for window displays; these cards will bear the League diamond-shaped slogan, "Made in California". There will also be a working plan for the campaign which may be had upon request from the League.

The purpose of the move is to effect the triangle of commerce by bringing into complete co-operation the producer, the dealer and the purchaser. Its advertising possibilities for the State are also of paramount consideration.

Chambers of Commerce throughout California are to enlist in the service of the "Made in California" week, and the chief executives of the various cities and villages will be asked by the League to give official sanction to the event.

Everything that is manufactured or grown any place can be manufactured or grown in California, is the official assurance of the Home Industry League.

On October 1 the Univeasity of Calif,. service flag contained forty two gold, and twenty silver stars; eight men had received the French Croix de Guerre, and ten had been individually cited for bravery under fire. Section 586, S. S. U., a unit of ambulance drivers composed almost entirely of University of California men, wear the Red and Green Cord "Fourargere" awarded for regimental bravery. These are but instances of specific reward for exceptionally valiant service.

The Wise American Housekeeper. —A Tribute—

—With apologies to Amy Lowell and other exponents of "free verse" (but unhappily scrambled for lack of elbow room)—

The American housekeeper has surprised the American public! More; she has surprised herself! These are facts which need explaining.

Can you recall, from young history, that familiar cry, "Cash and carry"? that slogan, "Go to market with a basket; save yourself and your country the expense of the delivery boy"? Groceterias grew apace. Service stores, some, turned to "cash and carry." Price baits were offered, tempting. All in anticipation of the American housekeeper and her basket.

But, in paying quantities, she didn't appear. Consternation! She was scheduled to appear—but she didn't; therefore she surprised the American public. She intended to appear—but she didn't; therefore she surprised herself.

There's a reason!

By the old plan the delivery boy cranked his "Lizzy" and served twenty housekeepers in an hour or two. By the new plan, twenty housekeepers were to don their second-best and serve themselves—for an hour or two. The time-value of twenty housekeepers not equal the time-value of one delivery boy? It was a joke!—which nobody saw at first.

She, the housekeeper, may not have seen the joke; but she felt it. Intuition! So she refused to perform. "Cash & Carry" didn't prosper; "We Deliver" did. All because twenty housekeepers felt themselves worth more than one delivery boy. (It was rather a joke!—on "Cash & Carry.)

That's the reason!

The American housekeeper has taught American business a lesson. She is keen. More; she is the compound tincture of wisdom! We Salute! Long may she live! She is explained.

Get Somebody Else

The Lord had a job for me,
But I had so much to do
I said, "You get somebody else,
Or wait till I get through."
I don't know how the Lord came out,
But he seemed to get along;
But I felt a kind o' sneakin' like—
Knowed I'd done God wrong.

One day I needed the Lord,
Needed him right away,
But he never answered me at all,
But I could hear him say
Down in my accusing heart,
"Nigger, I'se got too much to do;
You get smebody else,
Or wait till I get through."

Now, when the Lord have a job for me,
I never tries to shirk;
I drops what I have on hand,
And does the good Lord's work.
And my affairs can run along,
Or wait till I get through;
Nobody else can do the work
That God marked out for you.

—Paul Lawrence Dunbar.

The Thirty-Second Division

Hail! Valiant Warriors! Badger's own,
Hail! Wolverines! In clarion tone
We welcome you to home's dear zone.

According to your valor's rate;
Our greeting is proportionate
So here's welcome mighty, great.

You've seen your comrades "passing west;"
You've fought for all who were oppressed,
That we with freedom might be blest.

On Alsace's front, your "maiden" fight,
You planted in the per'lous night,
Old Glory, by dawn's early light.

In Soissons bloody battle went
Our "Bear Cats" with that high intent
To win the cause for which Right meant.

In Argonne forest's deadly fight
Where great guns roared by day and night
You conquered and the foe took flight.

That last great stand where Right proved might
The Battle Meuse, the holy light
Of peace was ours with honor bright

For now "The Day" your day appears
We welcome you with cheer on cheers,
Our Victors—valiant Volunteers!

—MRS. J. K. TIBBITTS.

BOY SCOUTS

(Conducted by National Council of the Boy Scouts of America.)

SCOUT AID ON "FOOL HILL"

Someone has said that the Boy Scout movement is the best thing ever invented to help get a boy over "Fool Hill." There is a time in a boy's life, and from twelve to eighteen years is the period, when "Fool Hill" generally makes its advent and is most conspicuous.

During this period scouting furnishes the guide posts. We all know that boys like to run in gangs. The scout troop fills the boy's natural desire for companionship.

Take such a gang or troop and divert its energy from breaking windows, robbing orchards, fighting other boys and similar mischief to swimming, first aid, boating, camping, hiking, scoutcraft and the like, and you are converting natural energy into a valuable asset, giving the boy a desire for useful information and making of him a potential citizen whose value to the country is beyond estimate.

DAN BEARD TO THE SCOUTS.

President Wilson has told the boy scouts to locate all the black walnut trees and also to save all the peach stones and nut shells we can, says Scout Commissioner Dan Beard. That is easy, but look here, boys, don't forget what the chief told you about planting nuts. November is the time to plant walnuts, hickory nuts and butternuts.

Let us emulate the example of dear old Johnny Appleseed, the old pioneer who planted apple trees all through the western wilderness of the Ohio valley. Johnny has monuments standing to him still in some of the apple trees which he planted a good many years ago.

We will have monuments standing for us in magnificent big black walnut trees, hickory nut trees and butternut trees which we are thoughtful enough to plant this autumn before all the big walnut trees are cut down and the plant exterminated in order to furnish gun stocks and propellers for our flying machines.

Don't forget now, boys, each scout should plant at least five black walnuts.

SIGN TALK FOR BOY SCOUTS.

Ernest Thompson Seton describes his new book "Sign Talk," as "a universal signal code without apparatus, for use in the army, navy, camping, hunting and daily life."

Besides giving 1,200 signs in use among the Plains Indians, Mr. Seton adds some of those used by the deaf in Europe and America, and also a great many that all of us use in everyday life, often without realizing it.

The American Plains Indian is undoubtedly the best sign talker the world knows today. Mr. Seton carried his manuscript from one Indian tribe to another, seeking always the best sign talkers among them, verifying his work and collecting new signs, always from first hand sources. Mr. Seton further interprets the sign talk with seven hundred drawings from his own pen. General Hugh L. Scott helped in the work of compilation.

TROOP MEET WITHOUT JOLTS.

Anyone who has driven over corduroy roads in a lumber wagon has observed that it is less comfortable than driving a high-class touring car over asphalt pavements.

Any scoutmaster who has attempted to lead a poorly organized troop through a crudely planned meeting, hike, or camp, has had a jolting which he might have avoided by laying out his course with greater skill.

A troop meeting may be as full of bumps as a corduroy road or it may work as smoothly as the drive that flattened the St. Mihiel salient. It depends upon the plan and the man behind it.

BELGIAN SCOUTS REBUILDING.

The Boy Scouts of Belgium are working to help rebuild their stricken homes and cities. Robert Lutens, secretary of the Belgian Boy Scouts' organization, who reached an Atlantic port on a British liner, brought the story.

"There were 6,000 of the boys in our organization just before the war," he said. "Many were killed brutally by the Germans in that ghastly first month.

"They were shot down when they served as stretcher bearers, and they were shot on other occasions without the slightest provocation. We have got the survivors together and they are trained for the reconstruction work."

Question For Question

Hub—Why does a woman say she's been shopping when she hasn't bought anything?

Wife—Why does a man say he's been fishing when he hasn't caught a ny thing?

KING OF ITALY AT A Y. M. C. A. POST

King Victor Emmanuel of Italy and Capt. Frederic Baugher inspecting the Y. M. C. A. post in the Casadel Soldato at Faenza. The king expressed his appreciation of the work done by the Y. M. C. A., which organization was new to Italy.

RADIO SIGNALS SENT UNDERSEA

Device Made Communication Through Water and Beneath Ground Possible.

SECRET HUNS DIDN'T KNOW

Maryland Scientist Is Persuaded After Much Pressure to Accept Remuneration for Time Spent Working on Invention.

Washington.—How underground and through-water wireless was put into practical use during the war was disclosed by navy department officials, giving to the public another of its secrets, carefully guarded so long as it might be of value to the enemy. Government officials regard this development, originated in private research by James H. Rogers, a scientist of Hyattsville, Md., as one of the war's major scientific advances of the kind.

In practical use the new system so far is employed only for receiving. Radio messages sent out from powerful stations in Europe are now being read at underground receiving stations in the United States and in some cases, better than when caught by the elaborate and expensive air stations.

Got Signals Under Waves.

In addition, it was revealed at the department, through an adaptation of the Rogers theory, submarines under water are intercepting radio signals sent from shore and with crude apparatus. The scientist has succeeded in transmitting signals two miles from a submerged wire simulating a submersible. Officials say it is possible, though not yet an accomplished fact, that ground or water sending can be developed to a considerable extent. They do not anticipate, however, that the present method of sending from high towers will be superseded except for limited special purposes.

The theory most generally held until Rogers demonstrated the correctness of his views, was that impulses hurled into the air from a radio transmitting station and deflected earthward became dissipated, as does lightning, when they struck the ground or water.

The Maryland scientist, however, believed that the impulses flowed through the earth as through the air and that it was only necessary to trap and measure them in the ground. He had been at work on this theory before the United States entered the war and already had interested naval experts. He offered the results of his work to the navy without restriction, and when they were accepted after some demonstrations at Hyattsville, officials say, he was with difficulty persuaded to accept even remuneration for actual time given to co-operation with the government.

One of the first steps taken was the request of the navy department, under war legislation, that his application for patents be expedited. This was done.

Main Advantages.

Some of the main advantages of the Rogers system as developed so far, according to experts, are almost negligible cost of construction, the intensifying of signals by pointing the sending apparatus toward the receiving station and reduction of static interference. Because of the latter advantage, the navy's receiving station at New Orleans, where communication with ships in Southern waters swept by frequent electrical storms is maintained, uses the underground apparatus with marked success.

In war a great advantage is that submarines receive messages while submerged. This is being done by wires trailing in the water.

The Rogers development aroused electrical experts of the government to new efforts to expand and improve radio transmission facilities. Out of the experimental work done with this and other ideas steady advance has been made under war pressure and Rogers' theories are interwoven with those of other men in the results that are being obtained.

GIANT DAM RIVALS NIAGARA

Mammoth Structure in the Tennessee Mountains Will Provide Horsepower Estimated at 80,000.

Knoxville, Tenn.—Surpassed only by the Roosevelt dam and Niagara falls, and the largest dam east of the Roosevelt dam, is the mammoth new dam just completed at Cheoah, in the mountains 47 miles south of Knoxville.

Twelve hundred men worked over two years on it. Two hundred thousand cubic yards of concrete were used. It is 210 feet high from surface of river to crest. It raises a mist 100 feet high as its water strikes the river after flowing over the top. It is 350 feet long at the base, 725 feet long at the top, 175 feet thick at the base and 12 feet thick at the top. Six days were required to fill the lake behind it, which is ten miles long; engineers had figured on 21 days, but a heavy rain helped. It will produce 7,500 units more of horsepower than the combined consumption of Knoxville, Memphis, Chattanooga and Nashville, or over 80,000 horsepower. It is almost identical with the Roosevelt dam in the West. The cost was over $1,000,000. Another dam will also be built in that region. It was built by and for the Knoxville Power company, an ally of the Aluminum Company of America.

Uses Electrical Device to Get Chicken Thief

Lawrence, Mass.—By means of an electrical invention of his own ingenuity, Ferdinand Bauer captured the thief who had been raiding his hencoop. The first night it was set out Bauer's electrical trap landed the intruder. Owners of coops in the vicinity have called on Bauer to make their coops burglar-proof.

ENGLAND HONORS HEROINE 16

Girl Grips Blazing Shell and Saves Factory From Destruction.

London.—The youngest member of the Order of the British Empire is Miss D. G. Vickers, aged sixteen. She has won the distinction for an act of great bravery. A small shell she was handling became alive owing to the fuse igniting, causing her to drop it, but realizing that there was a stick of unfinished fuses close by filled with powder, she coolly picked up the blazing shell, dashed to the door and threw it as far as possible. Both hands were badly burned and her injuries prevented her working for two months.

The staff of the factory presented her with a gold bangle and the lord mayor of Birmingham presented her with a specially designed brooch.

CARRIES UMBRELLA OVER TOP

Doughboy From Massachusetts Said He Didn't Want His Tin Hat to Get Rusty.

Webster, Mass.—Folks here are waiting to greet Private Stanley Karabash, the doughboy who "went over the top" carrying an umbrella. Karabash, in a letter to his home from a base hospital, says the reason he carried the umbrella was to protect his "tin hat" from rain. He didn't want the headpiece to get rusty, he said.

FIGHTS 60 FOES WITHIN AN HOUR

British Airman Has One of Most Remarkable Experiences of World War.

WAS OUT ON A LONE HUNT

Destroys Four Hun Machines, Disables Six, Suffers Three Crippling Wounds and Brings Back Machine in Repairable Condition.

American Press Headquarters, British Front.—The war over, a great many accounts of individual bravery will be heard for the first time, but none will excel this extraordinary tale of a British flying major, now recovering in a hospital.

The major, in a fast, single-seater scout, was out over the lines on a lone hunt. Discovering an enemy two-seater machine at 21,000 feet over the forest of Mormal, the major began climbing sharply to overtake him, got under his tail, fired at point-blank range and saw the two-seater break in pieces and fall, one occupant diving out in a parachute.

While watching the two-seater crash, the major suddenly heard bullets snapping and hissing about him. Under him was a Fokker biplane. Before he could make a turn he was wounded in the thigh, the shock stunning him for a moment so that his machine fell in an aimless spin.

Surrounded by Foes.

When he had recovered control he found himself surrounded by 15 Fokkers in attack formation. He drove at the nearest and the two were at once jockeying for favorable positions in terrific manuevers that carried them through the other 14. Chance shots during these evolutions sent down two of the major's adversaries, and then at ten yards he "got on the tail" of the first Fokker, probably the squadron leader, and shot him down in flames.

Then the major was wounded a second time, this bullet shattering the bone of his left thigh. In a dead faint, with his engine running at top speed, the Britisher fell in wild sweeping circles, until he once again regained his senses and was able to pilot his scout.

But the major was again set upon by another squadron of 15 Fokkers.

He charged straight at the machine ahead of him, firing at the same time. The Fokker burst into smoke and fell. Then the other Germans now centered fire on him, riddling his machine and shattering his left elbow so that the arm hung useless.

Again he was attacked by another squadron. Smoke came from his machine and he believed himself on fire. He used all his strength to try for a collision once more, and was still able to fire feebly. His success was repeated. A Fokker went down in flames at three yards range.

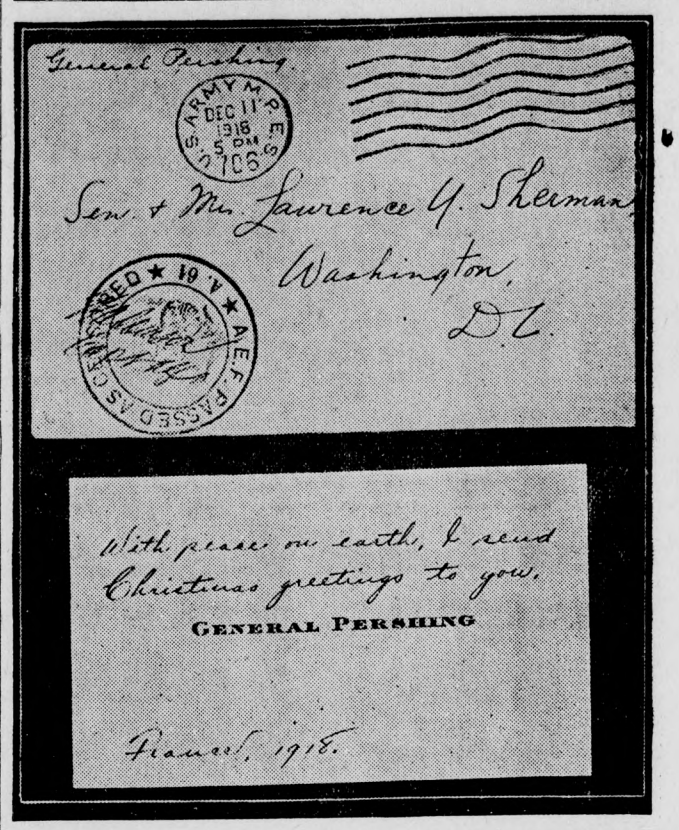
As he was now too dizzy to see, he dived to within a few thousand feet of the ground, just over the lines, his engine going "full out," so that it is a miracle his machine stood the strain, and again he was attacked, this time by eight enemy scouts.

The terrible descent seemed to brace him. British observers saw him go through the most amazing spins, spirals, zooms and all the tricks of the British scout fighter. In a 12-minute engagement he drove down two Germans out of control, broke free of the others and came home skimming trees and trenches. He probably will pull through.

WIFE OF ADMIRAL BEATTY

Lady Beatty is the daughter of the late Marshall Field of Chicago.

Handwriting of General Pershing



Two interesting things about this Christmas card from General Pershing to one of his best friends in the United States are the censorship stamp and the delicate, almost girlish handwriting. Friends to whom Senator Sherman showed the card invariably expressed astonishment at the handwriting of such a distinguished fighter.

PROHIBITION

Text of Amendment Making U. S. Dry Nation

Following is full text of the prohibition amendment on which state legislatures voted:

Joint Resolution Proposing an Amendment to the Constitution of the United States.

Resolved by the senate and house of representatives of the United States of America in congress assembled, two-thirds of each house concurring therein, that the following amendment to the Constitution be, and hereby is, proposed to the states to become valid as a part of the Constitution when ratified by the several states, as provided by the Constitution.

Section 1. After one year from the ratification of this article the manufacture, sale or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

Sec. 2. The congress and the several states shall have concurrent power to enforce this article by appropriate legislation.

Sec. 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several states as provided in the Constitution within seven years from the date of the submission hereof to the states by the congress.

CHAMP CLARK,
Speaker of the House of Representatives.

THOMAS MARSHALL,
Vice President of the United States and President of the Senate.

I certify that this joint resolution originated in the senate.

JAMES M. BAKER, Secretary.

Clothing Price and Style to Remain Same for 1919

Conservative members of the National Association of Retail Clothiers, who recently held a peace time readjustment conference in Chicago, declared there will be no advance in the price of clothing for 1919. It was said that the price levels of the fall of 1918 might be expected to be maintained. One prominent manufacturer said there is no demand for new styles in men's clothing, and that the numerous styles that have been in use will be continued with the military cut and belted models predominating.

TO THE POINT

What's become of the old-fashioned custom of going home to lunch?

Nothing beats the curiosity of a woman unless it be the curiosity of a man.

Every now and then we get a laugh out of seeing some one who isn't dead sure that he's right trying to convince the other man that he is wrong.

If every day were Sunday a lot of us might have to live up to our religions.

Wireless Telephony Is in Infancy and Distance May Be No Barrier in Future

Telephoning may be said to have reached the height of its power when the latest accomplishment is related. Already, observes the Des Moines Capital, we have heard that communication has been had from the ground with airplanes going at considerable speed. The distance of communication has been that of only two miles and then with the engine cut off.

Now the unprecedented record has been made of talking with a machine 100 miles away. Lieutenant Commander G. D. Murray talked to a naval airplane which was on its way from Washington to Hampton Roads; and the aviator heard what was said distinctly and even recognized the voice of the speaker.

The prediction is made that wireless telephony is in its infancy and the successful experiment just conducted leads to the belief that eventually it will be possible to talk at almost any distance with an airplane in full flight.

HOUSE POULTRY COMFORTABLY

Comfortable quarters should be furnished the pullets as soon as they are ready to start laying. The poultry house is both the home of the hen and the factory where winter eggs are produced. Unless it provides suitable living and working conditions the hen cannot accomplish satisfactory results, says T. B. Townsley of the University of Missouri college of agriculture. Comfort is the important essential of a poultry house. To provide comfort the house must be dry, well lighted and well ventilated and have sufficient floor space to furnish exercise by scratching. It must also contain sleeping quarters that are clean, well ventilated and yet free from drafts. All these conditions can be met in one room, thus economizing in the expense of building.

Ventilation in a poultry house is secured by leaving the south side relatively open and making the other sides tight. This provides plenty of fresh air without drafts. Where possible, light should be admitted from all sides. This prevents dark corners and eliminates the nuisance of having the litter all scratched to one side, which occurs when light is secured from only one direction. Exercise is insured by keeping the floor covered with several inches of straw, and feeding all grain in this litter. The roosting quarters should be compact and comfortable. They can be made easy to clean by placing all roosts on a level at the north side of the house and by arranging a platform underneath the roosts to catch the night droppings.

Enough Candles to Keep One Burning for 5,250 Years

The signing of the armistice left the American expeditionary forces in France with enough candles to keep one burning continuously without interruption for 5,250 years, according to an official statement from the office of purchase and storage of the war department. The primary use of the candles was to furnish lights in the trenches and dugouts.

Bottomless Pools Mysteries of Chimney Rock Section of Mountains of North Carolina

Nowhere else on our continent are more pronounced evidences found of nature's tremendous cataclysms than in the mountain sections of western North Carolina. Granite bowlders split in twain as by a giant's hammer, mighty fissures torn in the sides of lofty peaks, beds of streams upheaved in colossal mounds of jagged rock, or with great cavernous holes rent in them—these are seen on every side.

One of the so-called mysteries is the "bottomless pools" in the far-famed Chimney Rock section. The gorge through which pours the flood of Rocky Broad river is a great fissure torn through the very heart of the mountains. From the moment the waters enter the head of the gorge the river becomes a tempestuous torrent, plunging along a bowlder strewn bed, sending rocks grinding against rocks, leaping downward in a series of cascades to disappear at length with a wild plunge into the bottomless pools.

No one knows how deep they are. Every effort to sound them has been without success. At the foot of a cataract the first of these pools presents a boiling surface, from which leaps upward a blinding spray, drenching the limbs of trees that hang high above it. The second pool is like a simmering pot, while over the rim of the third, or last of the pools, the overflow trickles with a musical gurgle, spreading out into a shallow crystal stream that ambles away gently to the valley beyond the cascades.

Tracts in North Pacific as Large as This Country With Unfathomed Depths

There has been discussed the need of a comprehensive exploration of the Pacific ocean. It is believed, observes a writer, that such an undertaking should be on a far greater scale than has hitherto been attempted, and that future work should be broadly areal rather than local, as on single islands, or linear, as in single voyages. The work of the magnetic survey ship Carnegie, which makes repeated trips over many interwoven sea routes, is an example of the kind of exploration that is wanted. In the opinion of men of science, it should be continuous through ten or twenty years. It has been shown how little definite information the world has about the largest of the oceans. One specialist declares that in the north Pacific there is a tract twice as large as the United States that has been crossed by only a single line of sounding at intervals of 250 miles wide, and that there are a number of tracts as large as this country that are entirely unfathomed.

With the Jokesmiths

The Way of It.

"They don't reckon prize fights as they do money."

"How do you mean?"

"In money it takes ten mills to make one cent, but in the ring it takes hundreds of pounds to make one mill."

Her Divorce "Suits."

Male Friend — Looking forward to your divorce, eh?

Mrs. Flyppe—Yes; I'm simply dying to see what the papers will say about my costumes.

Good to His Folks.

"See here, Jones, why don't you sprinkle ashes on your icy sidewalk?"

"Because I don't want to deprive my family of any pleasure. You have no idea how it amuses the children to see people slip and fall down."

The Truth.

"He told his wife their evenings at the club were very quiet and harmless ones, and that sometimes for hours at a time they would just sit around the table and hold hands."

"Just so; he was speaking by the card."

Don't Do It.

"You wouldn't wear an overcoat that way. Yet many men—"

"Well?"

"Seem to wear their dispositions wrong side out."

Coarse Bark.

"I reckon you wouldn't believe it, ma'am," remarked the backwoods feller to the gullible old lady from the thickly populated districts, "but lots o' nights we are kept awake by the bark o' dogwood trees."

Quite a Difference.

"There is quite a difference between the blowhard and the garrulous toper."

"Say it."

"One is inebriated with the exuberance of his own verbosity and the other is verbose with the exuberance of his own inebriation."

The Market Value.

"I will pledge you my honor to repay a loan—

"Oh, your honor is security, is it? How much do you want? Thirty cents?"

Who Benefits By High Prices?

You feel that retail meat prices are too high.

Your retailer says he has to pay higher prices to the packers.

Swift & Company prove that out of every dollar the retailer pays to the packers for meat, 2 cents is for packers' profit, 13 cents is for operating expenses, and 85 cents goes to the stock raiser; and that the prices of live stock and meat move up and down together.

The live-stock raiser points to rising costs of raising live stock.

Labor reminds us that higher wages must go hand in hand with the new cost of living.

No one, apparently, is responsible. No one, apparently, is benefited by higher prices and higher income.

We are all living on a high-priced scale. One trouble is, that the number of dollars has multiplied faster than the quantity of goods, so that each dollar buys less than formerly.

Swift & Company, U. S. A.

SWIFT & COMPANY U.S.A.

WRIGLEY'S

The Flavor Lasts

Freshen a Heavy Skin

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented convenient, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Adv.

LISTEN TO THIS! SAYS CORNS LIFT RIGHT OUT NOW

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted out, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.—Adv.

DON'T GET RUN DOWN.

Weak and miserable. If you have Kidney or Bladder trouble, Headache, Backache, Dizziness, Nervousness and feel tired all over, get a package of MOTHER GRAY'S AROMATIC LEAF. It never fails. Sold by all Druggists or sent by mail for 50c. Sample sent FREE Address, The Mother Gray Co., Le Roy N. Y. Adv.

CALOMEL SELDOM SOLD HERE NOW

Nasty drug salivates, makes you sick and you lose a day's work.

Every druggist in town—your druggist and everybody's druggist has noticed a great falling off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place.

"Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle costs but a few cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tone is a pleasant-tasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day's work! Take Dodson's Liver Tone instead and feel fine, full of vigor and ambition.—Adv.

Your Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggists or by mail 60c per Bottle. For Book of the Eye free write h-18 Murine Eye Remedy Co., Chicago.

Soldiers Soothe Skin Troubles with Cuticura

Soap 25c. Ointment 25c & 50c

She—I was a fool to marry you.

He—No doubt; but I'm not willing to let you bear all the blame. I asked you.

KIDNEY TROUBLE Is a Deceptive disease—thousands have it and don't know it. If you want good results you can make no mistake by using Dr. Kilmer's Swamp-Root, the great kidney medicine. At druggists in large and medium size bottles. Sample size by Parcel Post, also pamphlet telling you about it. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper.—Adv.

Proof that Some Women do Avoid Operations

Mrs. Etta Dorion, of Ogdensburg, Wis., says:

"I suffered from female troubles which caused piercing pains like a knife through my back and side. I finally lost all my strength so I had to go to bed. The doctor advised an operation but I would not listen to it. I thought of what I had read about Lydia E. Pinkham's Vegetable Compound and tried it. The first bottle brought great relief and six bottles have entirely cured me. All women who have female trouble of any kind should try Lydia E. Pinkham's Vegetable Compound."

How Mrs. Boyd Avoided an Operation.

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided that I would have to go through an operation before I could get well.

"My mother, who had been helped by Lydia E. Pinkham's Vegetable Compound, advised me to try it before submitting to an operation. It relieved me from my troubles so I can do my house work without any difficulty. I advise any woman who is afflicted with female troubles to give Lydia E. Pinkham's Vegetable Compound a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N. E., Canton, Ohio.

Every Sick Woman Should Try

Before Submitting To An Operation

LYDIA E. PINKHAM MEDICINE CO. LYNN, MASS.

BERMUDA GRASS IS VALUABLE AS FEED

Troublesome Weed Makes Good Sod and Pasture.

Susceptibility of Root-Stocks to Winterkilling and Its Inability to Withstand Shade Make It Easy of Eradication.

(Prepared by the United States Department of Agriculture.)

Bermuda grass is one of the most valuable as well as the most troublesome grasses of the Southern states. This vigorous growing perennial spreads rapidly, making a thick sod which is well suited for pastures and lawns. The same characteristics that make it so valuable also render it one of the principal weeds the eradication of which is essential to the successful growing of intertilled crops. The plant has certain natural weaknesses, such as its inability to withstand shade and susceptibility of the root-stocks to winterkilling, which can easily be made use of in its eradication.

The most widely practiced and successful control measures, especially in the Southwestern states, is a combined attack upon these two weak points by alternating a summer shade crop, such as velvet beans and cowpeas, with intertilled crops, such as corn and cotton, keeping the soil occupied with growing oats or rye, with or without vetch, during the winter.

Hogs are also useful in eradicating this grass. They are fond of the root-stocks, and they will be aided greatly in the good work if the land is first plowed. A good system is to graze the land an entire season, continue the grazing the following season until midsummer, then plow shallow to expose the root-stocks to the drying action of the sun and the persistent rooting of the hogs.

Bermuda grass may be winterkilled by exposing the root-stock system to freezing, but this method is effective only in the northern part of the Bermuda grass area, as killing frosts do not ordinarily occur in the central and southern parts. In small areas, such as gardens, the root-stocks may be gathered after the land has been plowed, with a rake or fork, and burned. Where only small patches are infested they may be covered with heavy paper, preferably roofing paper, which should be weighted down. This so completely shades the plants that in about two months they will be killed.

Bermuda grass was at one time looked upon solely as a pest, but in view of the fact that it is exceedingly valuable for pasture, hay and lawn purposes, the plant has been widely utilized throughout the cotton belt and its value is far in excess of the damage which it causes.

PREVENT WASHING OF SOILS

Good System of Broad-Base Terraces Is Recommended—Work Can Be Done at Any Time.

(Prepared by the United States Department of Agriculture.)

The maintaining of soil fertility should be one of the supreme aims of every farmer. The most universal source of loss is from soil washing. Nothing will do more to prevent this loss than to establish a good system

Plowing Over a Terrace.

of broad-base terraces. This is conjunction with a well-planned cropping system, will not only maintain but increase soil fertility. Terracing can be done at any time during the year when the lands are free of growing crops. In the cotton states the weather is rarely too severe during the winter to prevent this work from being done. Those who have not already terraced their farms should see the county agent and get his advice and help along this line.

PROPER FEEDING HELPS COW

If Rightly Fed All Her Life Animal Will Be of Value When Old—Overfeeding Is Harmful.

If the cow has been rightly fed all her life she will be a good cow when she becomes old. A cow that has been overfed for years will have become "burned out" by the time she is ten or twelve years of age. The cow that has never been fed to bring her up to her highest capacity for milk giving will have fixed her habits of milk production at a low point and will not be valuable as an old cow. She will, therefore, have to be disposed of to the butcher several years before she would otherwise have gone out of service.

A Letter From Robert Dunphy

American Expeditionary Forces,
Y. M. C. A., Army of Occupation
Sayn, Germany, Febrbary10, 1919.

Dearest Mama:

Yours and Harriet's welcome letters of January 18th. came to night and I surely did enjoy them. I can't imagine why my letters should be held up. Here is just how often I have written home according to my note book. 11-30, 12-7, 12-12, 12-23, 1-7, 1-9, 1-19, 1-24, 1-27, 2-4, to Mother. and to Harriet, 12-17, 12-24, 1-1, 1-17, 2-9. So you see I have written oftener than once a week,

Well I received some good news tonight. The "top kicker" (1st Serg. of the company) called me down to his room and told me, I was in the next bunch to go to Neuwied, a town of 19,000 one of the leave areas on the Rhine, for a three day leave. From there I can spend a day in Coblenz. I probably go some time tomorrow with two other fellows. They have a swimming tank there and several trips to old castles and a boat ride up the Rhine I believe. They have a hotel for those on leave to eat at, and the "Y" furnish you with ice cream. all you can eat (real American) and along with a day in Coblenz I think I can spend a very pleasant three days. I will have three mornings I can sleep till 8 or 9 o'clock

In the "Stars and stripes" that I sent this week they have the "write up" of the 32nd Div. Be sure and keep all of these papers I'm sending home.

I think my earlier letters will answer all of your questions in regard to sleeping quarters, baths. eats, cooties, Y. M. C. A. and entertainment. In regard to the cooties I might say I find about three a week which come off the blankets used in the hospital. As we have no way of giving patients a bath as they come in there are bound to be cooties.

I am returning one of those clippings which caused me a little amusement over the fact that this man was wearing the "divisional citation" on his shoulder which is nothing more than the divisional ensignia of the 28th Division National Guard of Penn. Just like we wear the red arrow with the bar to represent the 32 Division. Every combat division has its shoulder Insignia. The "Stars and Stripes" which I sent a few weeks back, gave them all.

I went down to the Krupp works today and had a good shower bath. You ask who my commanding officer is. Major George W. Neilson is his name, a former physician of Milwaukee. He organized the company as Field Hospital No 1 of the old Wisconsin National Guard in 1916.

They went to the border in 1916 and came back and were called out in 1917 and went to Waco, Texas and trained till the 32nd Division was formed from the Wisconsin and Michigan National Guard.

I spent a very pleasant evening at the "Y". They had a very good speaker from Boston with a pleasant English accent. He spoke on the Capital and Labor situation in the United States, the effect of the war on the same and offered the influence of the consumer or community as a balancing power between the two.

This was followed by a troupe of three a man who was a cartoonist, a girl who sang and another who played the piano.

The rumors are still going around that we are to start for home this month.

Well I must close and roll my pack for the leave tomorrow. A soldiers pack is the civilians suit case. Hope this finds everybody as well as myself.

With love to you and all from,

Robert

ARMY SURGEONS REBUILD YANKS BODY AND MIND

West's Crippled Heroes Being Fitted to Make Their Own Way.

Reconstruction—no, that's too prosaic. Regeneration is the only word that can describe the remarkable work of rebuilding the wounded in the military hospitals. One feels, after a tour of one of these hospitals, that he has been permitted a visit to a divine workshop where men are fashioned in parts, put together, and taught to function. God made Adam of dust, but these modern scientific surgeons make their men of wood and iron, gold and silver, bone and clay. That is the physical.

Of the mental and spiritual—that which is intangible—well, only this: these surgeons blow into their men of wood and iron, gold and silver, bone and clay, a spirit. And having blown into their product this spirit, they feed the spirit. Then months later from this hospital walks a man who was a machinist before his legs were blown off at Chateau Thierry. Now he is a draughtsman on his way to a job, confident, happy, independent. He is walking on legs of iron and wood. You would have to see him take them off before you would believe it. He walks so well. Yet his legs are no newer than his spirit or his ability as a draughtsman. Nor is his spirit or ability less firm than those new legs of wood and iron.

The Cost.

There are 1200 war wounded and sick in Letterman General Hospital in the Presidio at San Francisco. Most of these men from the Argonne, Belleau Wood, St. Mihiel, Chateau Thierry, are being remade bodily and spiritually. Of the two phases of their regeneration, the spiritual is perhaps the more difficult. For when a man is mangled of his legs, or his arms, or his eyes, he is apt to lose more than those physical assets. He loses his economic value and with it his confidence and his self-respect. For proof of that we have the legless, the armless, the blind begging on our street corners. They have lost their spirit.

Of course, this divine workshop of the military surgeons is an expensive regenerator. It takes thousands of dollars each month to carry on the work in Letterman Hospital alone, and Letterman is only one of many such hospitals, all of them run by the government.

So next April when the Victory Liberty Loan comes aknocking at your door, remember that a big part of the money you lend is to be used to keep running the machinery of these divine workshops where men who were mangled for love of America are being remade.

An official of the board of health, in a town not far from Boston, notified a citzen that his license to keep a cow on his premises had expired. In reply to his letter, the official recieved the following communication:

"Monsieur Bord of Helt —I just get your notis that my license to keep my cow has expire. I wish to inform you M'sieur. Bord of Helt, that my cow she beat you to it,—She expire t'ree weeks ago. Much oblige. Yours with respeck, —Pete. —*Boston Transcript.*

Dreaming

By Albert W. King

Did you ever seek in summer
Some softly flowing stream
And reclining close beside it
Just dream and dream and dream—

About the cosmic universe
About false friends and true,
And the many many things you've done
And some you didn't do?

It's at such psychic moments
The leaves of life unroll,
And you feel an inspiration
To analyze the soul—

That cryptic inner consciousness,
That sentinel set apart
By God to purge the evil
That breeds about the heart.

Oh when summers in its glory,
Seek out some mountain stream
And reclining close beside it
Just dream and dream and dream.

About the cosmic universe
About old friends and true
And the many things you might have done
But some you didn't do;

It will be a revelation—
As these leaves of life unroll
And you seek with keen edged scalpe
To analyze the soul.

4114 San Pablo avenue,
Oakland Cal.

SEND ME THE BILL

W. C. T. U. Entertainment Tonight

The W. C. T. U. is to give an entertainment in the grammar school auditorium Friday evening, the 14th. and the program promises to be a rare treat.

The following numbers are on the program;—Star-Spangled Banner, by audience.

Instrumental Solo,. . . . . .Miss Arnot
Reading,. . . . . .Mrs. J. O. Duncan

Song,. . . . . .Mrs. Ralph Hyde
Accompanist, Mrs. Geo. Robson
Reading, ...Miss Draper
Song, ...Mr. Kammerer
Reading . . . . . Mr. Thos. Weld
Drill, ...8th grade
Duet,. . . . . { Mr. Cramer / Mr. Verleger
Piano Solo, ... Irma Young

The admission is 10c for children, 20c for adults.

Excerpts From Mrs. Gillis' Address

The address by Mrs. Charlotte Raymond Gillis, Assistant Professor of English in the College of Agriculture, Manilla, Tuesday afternoon, at the M. E. Church, on "The Phillipines and Philipino Women", was both interesting and informing, and was much enjoyed by those who heard it.

Mrs. Gillis urged the necessity of every American citizen feeling an individual responsibility in the work of making the world a safe and happy place to live in, by spreading the doctrines and customs which will secure that end. "The Phillippine Islands are peculiarly the job of the United States. The results of the policy followed by the United State are watched by every colonizing nation in the world. If the government of the United States consists in the individual citizens, then the praise or blame will be reflected upon each individual. The Fillipinos resent, and rightly, the meeting with Americans who think the Islands are near Cuba, or that all the people go about naked taking each other's heads. They did not ask to be adopted, but, being adopted, have a right to expect that the good American mother will show an interest in, and knowledge of the child."

After giving a resume for the various divisions and sub-divisions of the people of the Islands, both Christian and Non-Christian, including a description of their peculiarities, manners and customs, she discussed the status of the Christian Filipino women. This status is much higher than that of other women of the Orient, due to the introduction of monogamy by the Christian religion and to the civilizing effect of European influence. Except for certain social restrictions, the Filipino woman occupies a place on a par with the American woman. She is not allowed to vote, but the Solons of the Legislature are contemplating giving her that right. She occupies a more prominent place in industry than does the American woman, and under American influence is entering the professions.

The Philippine Islands will be a monument to America's policy in one respect, namely the introduction of a public school system. The Islands pay all the expenses of their schools from their own revenue. The last legislature passed a bill which, when it's provisions are carried out, will give every child in the Islands a chance for the education for which they are eager.

Mrs. Gillis wore the costume of a Fillippino woman, combining in its design both the dress of the society and working women. The shirt, with exceedingly long train, was of brocaded yellow silk. The camisa (waist) was of native woven rengue and the pannela (collar) of the same material. Miss Marie Purmort wore a Benguest Igorot girl's costume of man colored striped Ilocano cloth, and carried the musical instrument of the market men, a piece of bamboo split.

Local and Personal

Mrs. Beardsley is visiting friends in Visalia.

Antone Musladen of Sunnyside has bought an apple orchard near Watsonville.

Wanted—Family sewing and dressmaking. Mrs. Drake 69 Central Ave. Campbell.

The Red Cross has received word from headquarters that they are nearing the end of war work.

NOTICE— There will be no work at the Red Cross rooms on Friday but it is hoped there will be a good attendance on Monday.

Two well located houses in Campbell for sale. SEE E. R. KENNEDY, sole agent, and make offer.

The W. C. T. U. will meet with Mrs. Ellen Kennedy, North First Street, Wednesday, March 19, 2:30, P. M.

Mr. Robert Campbell, who has been in the O'Connor Sanitarium for some time is reported to be much better, and is expected to be out soon.

The Quality Shoes for every purpose where real service is required. As a guarantee against foot troubles buy the Lion Brand Work Shoes at E. E. Sower's

FOR SALE—Flemish Giant Rabbits at a bargain.

Flemish does with five and six young rabbits six weeks old $3.50. Bucks $2.50. Young rabbits weighing 5 lbs $1.00. Going to move, must sell Snyder's Place, Cor. Campbell and Johnson avenues.

Judge F. B. Brown and wife, of San Jose, D. Fay Babcock and Mrs. Babcock of Hastings, Nebraska, and Mrs. F. H. Ryan and daughter Miss Irene Ryan, were guests at the pleasant home of Mr. and Mrs. C. H. Whitman on Tuesday evening and all enjoyed themselves imensely talking over old times, acquaintances, and friends, and comparing the past with the present. They were all formerly from the same place in Illinois.

Girl Reserves Explained

Miss Sams, one of the Secretaries of the San Jose Y. W. C. A. was out Tuesday and spoke to the home and school club. She explained the objects for which the present campaign for funds was planned and also gave somewhat in detail the purposes and plans of the Girl Reserves. Groups of the organizations are being formed in San Jose and thruout the county, and she was endeavoring to arouse an interest in the same here.

The ladies of the club completed work on seven layettes for French babies, and also several crib quilts and many extra garments.

There will be a meeting as usual next Tuesday.

High School Notes

You have heard many rumors in regard to the annual entertainments that the Campbell High School give. These are the facts of the coming show, the Junior Senior Show.

Naturally, everybody likes to know what he spends his money for. Last year, you will remember, you spent one dollar for a season ticket which admitted you to three of the best entertainments you had seen at the high chool. You enjoyed yourself. You spent one dollar to help our boys who were fighting for us; for liberty. Dident it do you good to know that you were giving at least a little bit to help somebody? Of course it did.

Now this year, we are not asking you to buy a senson ticket to benefit our boys "over there" fortunately, but we do ask you to buy a season ticket to help our nine little homeless children of France which we adopted at the begining of the school term. We are continuing our "jitney fund" which increases our amount greatly. Think about the good times your children have and how comfortably they are dressed; then think of some of the little French children; Many of them wearing wooden shoes and straw in them for stockings this very day! You can't fully realize how these children, some of them mere babes, do appreciate the little mite that some kind person in far away America do for them, and to know that some kind friend is thinking of them.

When you come to the high school you will see the picture of our nine children and read some extracts from their dear little letters. You will feel that you are helping to support these same children

You will enjoy yourself; first, because you are benefiting a good cause and sdcond, because the show will be a joy.

Come and have a good laugh! March 21 and 22! Don't forget!.

Lucile Ellison and Willie Petry with their violins, with Mae Ellison at the piano, will furnish a splendid trio.

Tickets will be for sale begining Friday morning and seats may be reserved by telephone from the office beginning Monday morning for the first entertainment, the Junior play, "The Florist Shop and the Senior Show, Trouve." The second entertainment will be The May Festival a reproduction of Shakespeare's Mid-summer Night's Dream. You can acquire single tickets for thirty-five cents each or season tickets for fifty cents.

Get your tickets early and be the first to reserve a seat Monday morning. Avoid the rush!

High School Y. M. C. A.

The Y. M. C. A. in Campbell is assured of success, if one may judge from the meeting at the High School at 4 o'clock Thursday afternoon, March 6.

Mr. Hicks, County Y. M. C. A. Secretary—who was present at the meeting gave the boys a short talk concerning the Y. M. C. A. and its work toward providing rural boys with the essential requirements for an all-round development—religious, physical, social and intellectual.

Principal Irving W. Snow has accepted the leadership of the High School "Y" gronp, with Mr. Cramer as Associate—a fact full of promise; for able leadership is the secret of County Y. M. C. A. success. The four-fold Y. M. C. A. in the hands of real leaders means great things for the young men of a community. Campbell has the leaders, the program and the boys; the future is theirs.

This older group of boys will meet every Thursday evening at 7:30 o'clock in the Campbell Union High School.

Mr. Nat Jones was elected president for the 'Y' association, after which he took the chair and the following officers were elected:

Vice-President, Mark Smith; Secretary, Oscar Seagren and Treasurer, Rudolph Hoerler.

Before the meeting was adjourned, two committees were chosen by President Jones. Those chosen for the drawing up of the constitution consisted of the following students:

L. Maleck, L. Cairns, R. Bartholomew, O. Seagren and R. Crawford.

The entertainment committee consisted of the following students:

V. Lopez, R. Hoerler, E. La Montagne and H. Cowk.

Others present, who will be the nucleus for all the Social, Physical, Religious and Intellectual phases of the work were:

Harold Ouimet, John Pardee, Vincent Lopez, Edward Day, Leslie Cairns, Bliss Baker, Roy Bartholomew, Elert La Montagne, Lloyd Maleck, Harold Cowk, Forrest Von Dorsten, Floyd Howes, Francis Bricmont, Harold Townsend and George Guhe.

With two Y. M. C. A. groups launching out in the space of one week. (The Grammar School Group headed by Mr. Bohrman started last Tuesday) the people of Campbell may well feel optimistic as to the future.

Miss Lucy Vandergon will not go East with her parents at present, as she expects to finish her year's school at Morgan Hill.

Herbert Jaynes has purchased Mr J. B. Gards dairy cows and has taken over his milk route. Mr. Jaynes has a good location for a dairy and will undoutedly be able to make a success of his new business venture.

CONSTABLE'S SALE

UNDER AND BY VIRTUE OF AN execution issued out of the Justice's Court, Campbell Township, County of Santa Clara, State of California, and to me directed and delivered for judgment rendered in said court, on the 20th day of May, A. D. 1918, in favor of A. G. Wilkins, plaintiff and against C. H. Burger and Dicie Burger, his wife, defendants for the sum of $249.72 debt, together with costs of suit and interest, I have levied on all the right, title, claim and interest of said defendants and each of them, in and to the following property situated in the County of Santa Clara, State of California, standing of record in the name of the Mutual Building and Loan Association of San Jose and College Park and particularly described as follows, to-wit:—

Commencement at a point on the South line of Fruit Dale Avenue, at a stake marked C. 1., which stake is distant S. 89° 45' E. 11.72 chains from the intersection of the said South line of said Fruit Dale Avenue, with the Easterly line of the Santa Cruz Avenue, now known as the San Jose and Los Gatos Road, and from said stake running thence S. 0° 2' E. 282 feet; thence N. 89° 45' W. 72 feet hence N. 0° 2' W. 282 feet to said South line of said Fruit Dale Avenue; thence East and along the South line of said Fruit Dale Avenue, S. 89° 45' E. 72 feet to the point of commencement.

Notice is hereby given that ON TUESDAY, THE 8TH day of APRIL A. D. 1919, at 10 O'CLOCK A. M. of said day, I will sell the right, title and interest of said defendants C. H. Burger and Dicie Burger, his wife, in and to the above described property, standing of record in the name of the Mutual Building and Loan Association of San Jose and College Park, or so much thereof as may be necessary to satisfy plaintiff's claim, besides all costs, interest and accruing costs.

The sale will take place at the North East Corner of Campbell and Central Avenues in the city of Campbell, County of Santa Clara, State of California, at public auction for cash in hand to the highest and best bidder.

Dated, Campbell, California, this 14TH day of MARCH, A. D. 1919.

T. L. SHARP,
Constable Campbell Township
